I did find out the name of the drillers for Albion. EDAC out of Muskegon. We've used them before. I guess I have a mixed reaction but I do with all drillers these days. I must say their marketing person called me enough about this project and when I finally get totally fed up with him chewing up my time after repeatedly telling him, it wasn't our work to be let, he certainly was persistent!!

Dean Stockwell called for a variety of things - em, mag files, bench mark elevations/locations, etc. I didn't think it would be a problem to get them those, let me know if it is. In the process of digging around for these, I stumbled across the property owners to the east (as of 1992). So, I presume I made their day when I faxed it over... Most of the parcels are owned by one family. So, that should make it easier. Have a good weekend.
